## Foreword

Administered annually, the Navy-wide Personnel Survey (NPS) is a major product of the Navy Survey Resource Center (NSRC) at the Navy Personnel Research and Development Center. The 1994 NPS examined the perceptions of enlisted and officer personnel in a variety of areas including detailing and the assignment process, quality of life programs, organizational climate, and health issues. This information is valuable to managers and policy makers in program formulation and evaluation.

NPS 1994 was conducted under the sponsorship of the Chief of Naval Personnel (PERS-00) within reimbursable Work Unit 95WRPS500. Data collection concluded in mid-January 1995, and the results of the survey were briefed to the Chief of Naval Personnel and his staff in April 1995.

This technical note presents statistical results for enlisted personnel. NPRDC-TN-95- provides statistical results for officers. Any questions regarding this report should be directed to Dr. John Kantor, (619) 553-7651 or DSN 553-7651.

## Summary

The fifth annual Navy-wide Personnel Survey (NPS) was mailed in October 1994 to a random sample of about 17,000 active duty enlisted personnel and officers. Completed questionnaires were accepted through mid-January 1995. The adjusted return rate was 47%. Survey topics included detailing and the assignment process, quality of life programs, organizational climate, and health issues. Responses were weighted by paygrade to allow generalization of sample results to the Navy population. Responses for enlisted personnel are broken out by paygrade and other important demographic variables.

# Introduction

## Problem

Job satisfaction, quality of life, and career concerns of Navy personnel take on added importance in an era of downsizing in which each individual must contribute to the increased efficiency required of a reduced force in a still-hostile world. Navy personnel attitudes and opinions represent input vital to the development and continuous improvement of Navy policies and programs. Therefore, such opinions must be measured in a systematic and timely fashion, and furnish an accurate reflection of the views of the Navy's diverse and widespread workforce.

## Purpose

The annual Navy-wide Personnel Survey (NPS) was designed to collect attitudinal data on a systematic basis and to provide timely information on issues of importance to policy makers. The annual sampling, representative of the entire Navy population, allows the identification and analysis of trends in attitudes toward plans, programs, and policies that materially affect the performance and morale of Navy personnel. The survey was also designed to accommodate the study of topics of current, compelling interest on a one-time basis. This technical note provides enlisted personnel results of NPS 1994, the fifth administration of NPS.

## Approach

NPS questionnaires were mailed in October 1994 to a random sample of 4,591 officers and 12,409 enlisted personnel with a projected rotation date of April 1995 or later. Personnel who received the 1993 survey were not eligible for inclusion in the sample. The sampling represented approximately 5% of the eligible enlisted population and 13% of the eligible officer population. Of the original sample, approximately 1,000 surveys could not be delivered. Reminder/thank you postcards were mailed to the entire sample four weeks after the surveys. The return rate, adjusted for non-deliverables, was 47%. Table 1 displays unadjusted return rates for paygrade groups, total enlisted, and total officer groups.

The survey requested demographic information and measured military personnel attitudes and opinions in various areas, including detailing and the assignment process, quality-of-life programs, leadership training, organizational climate, and health issues.

The statistical tables are based on weighted data. Responses were weighted by paygrade to reflect each paygrade's actual proportion in the Navy, thereby allowing generalization of sample results to the entire Navy. Separate weighting schemes were employed for enlisted and officer personnel; i.e., within the enlisted/officer groups, each paygrade was weighted separately.

For statistical analyses, enlisted personnel were grouped together according to paygrade: (1) E-2 and E-3, (2) E-4 through E-6, and (3) E-7 through E-9. Personnel in paygrade E-1 were excluded because of their limited time in the Navy. Officers were assigned to one of three groups: (1) W-2 through W-5, (2) O-1E through O-3E and O-1 through O-3, and (3) O-4 and above.

**Table 1**  
**Return Rates for Paygrade Groups**

<sup>a</sup>Population N = all personnel in the Navy eligible for participation in the survey. Many individuals were excluded because they were on TAD or their PRD was scheduled soon.

<sup>b</sup>Percent return was calculated without adjustment for surveys that could not be delivered.

<sup>c</sup>Includes O-1E through O-3E.

### How to Read The Statistical Tables

The information contained in each statistical table is described in Figure 1.

1. Question number and description of question.
2. Question number from which respondent groups are derived--in this case, paygrade groups.
3. Respondent groups.
4. Respondent options.
5. (Weighted) number of responses.
6. Column percent: For a given (weighted) respondent group, the column percent provides a distribution of responses across response options. For example, 41% of E-2s and E-3s answering Q12 selected "none."
7. Total number of respondents (weighted) selecting option.
8. Percent of all respondents (weighted) selecting option.
9. Total number (weighted) of respondents.
10. Total number (weighted) of respondents in group.
11. Percent of all respondents (weighted) in group. For example, 404 E-7s through E-9s represented 17.4% of all respondents.
12. Number of respondents (weighted) who omitted question.

Note. The weighting procedure followed by rounding to whole numbers may sometimes produce a zero frequency combined with a nonzero percentage for a cell. For all practical purposes, such results may be ignored.

**Figure 1. Statistical table for Question 12.**

### Organization

The sequence of statistical tables in this report corresponds to the sequence of questions in the NPS 1994. A copy of the NPS 1994 appears in Appendix A. In the first analysis for each question, all response options were included. A second analysis was conducted in which the "Does Not Apply" option was omitted. Also, in the second analysis, response options were collapsed for agree/disagree questions, with "Strongly Disagree" and "Disagree" as one category and "Strongly Agree" and "Agree" as another. All questions were broken out by paygrade and at times by other important demographic variables.

## Margin of Error

Tabulated results are accurate at the 95% level of confidence within the margins of error displayed in Table B-2. (See Appendix B for a discussion of margin of error in estimation of percentages.) In general, the error for the aggregated enlisted group would not exceed  $\pm 1\%$  and would not exceed  $\pm 2\%$  for the aggregated officer group.

**Appendix B**  
**Margin of Error**

## Margin of Error

Tables B-1 and B-2 are used to estimate confidence intervals, or "margins of error", around the survey percentage results presented in this report. Table B-1 displays the unweighted sample sizes, and Table B-2 provides the margin of error around the estimated population percentages represented by obtained survey results. Obtained results are accurate at the 95% level of confidence within the margins of error displayed in Table B-2.

To find the margin of error for a given survey percentage result, first consult Table B-1 to determine sample size, then look up the margin of error in Table B-2. The margin of error from Table B-2 is added to and subtracted from the survey percentage result. In this way, one determines the interval within which one would expect the percentage to fall for the entire Navy.

For example, consider the survey question, "I enjoy my career in the Navy." Thirty-three percent of E-2s and E-3s agreed, 55% of E-4s through E-6s agreed, and 84% of E-7s through E-9s agreed. Total enlisted sample agreement was 53%. To find the margins of error for these percentages, first find the unweighted sample sizes from Table B-1. For enlisted, total sample size was 4,598; for E-2s and E-3s, 931; for E-4s through E-6s, 2,054; and E-7s through E-9s, 1,613. Then, consult Table B-2, locate the closest percentage split at the top of the table, and the sample size in the first column. For the total sample, 50/50 represents the closest split; for E-2s and E-3s, 70/30 the closest split; for E-4s through E-6s, 60/40; and for E-7s through E-9s, 80/20.

The intersection of sample size and split provides the margin of error for the survey result. For the total enlisted group, the error would be approximately  $\pm 1\%$ ; thus, the true population percentage would probably fall within the interval of 52% to 54%. For E-2s and E-3s, the interval would be 30% to 36%; for E-4s through E-6s, 53% to 57%; and for E-7s through E-9s, 82% to 86%.

Note that the margin of error increases as sample size decreases and the percentage split approaches 50/50. Thus, the margin of error can vary from 14 points (sample size of 50 and a percentage split of 50/50) to zero points (sample size of 6,000 and a percentage split of 98/2). *Extreme caution* must be used for survey results with a large margin of error.
